

# S.L. KING TECHNOLOGIES INC. TECHNICAL QUALIFICATIONS

## GENERAL ENGINEERING CONSULTANT

ATLANTA, GA

L. King Technologies, Inc. (SLKT), has consistently supported national transit agencies such as the Metropolitan Atlanta Rapid Transit Agency (MARTA) in providing a wide range of transit management support for well over twenty years and continues to provide on-demand professional transit engineering consulting services. SLKT has participated in providing seconded staff and partnered with national transit professional engineering firms to provide transit technical support for agency operations, maintenance and capital programs. Providing services under subcontracts to WSP Global, Hatch Consulting (formally LTK Engineering) and as a member of a joint venture partnership with Metropolitan Atlanta Transit Consultants (MATC), SLKT has established a reputation for reliably contributing a wide range of technical skills to support the transit industry. SLKT continues to provide efficient vehicle operations and maintenance support and provide technical leadership in establishing processes and procedures to maximize efficient use of agency resources. SLKT continues to provide asset management leadership in transit applications and is now performing at the forefront of assisting agencies establish professional asset management and developing and converting carbon based vehicle operations to a zero emission position for future growth.

### Scope of Services Provided

SLKT has continued to provide a full range of project management staff and is currently providing staff as Capital Project Manager (Commercial), project administration, asset management, vehicle commissioning, quality assurance inspection, facility asset management and capital planning. SLKT continues to provided seconded project administration staff to manage project documentation control, specification development and equipment procurement, configuration management and control of project drawings. SLKT seconded personnel also provided supervision and coordination of all related activities associated with management of planning, design and construction for multiple projects.

SLKT was tasked to assist MARTA in development and implementation of its new asset management system. The Life Cycle Asset Reliability Enhancement (L-CARE) system was developed under a contract with the Federal Transit Administration to provide a reliable system of defining and establishing the current state of good repair for transit agency assets and effectively manage the life cycle of each asset. MARTA's program became one of the nations first such systems and became a guide for the development of the subsequent MAP-21 asset management requirements. SLKT continues to be an integral participating member of MARTA's asset management program team and has continued to provide MARTA with critical seconded technical staff since it inception.

SLKT has now expanded it experience base through teaming with established manufacturers and vehicle manufacturing firms to provide installation, testing and commissioning of battery charging systems and providing warranty and after sales maintenance service of level 3 charging systems.
